Title: Intelligent Fire Management System

Team Members: Dhivakar B, Ahamed Jamaldeen S , Maheshwaran P

Team Leader: Michael Jones J

IOT is one of the fast-growing fields and offers flexible access to resources. In this article we are going to make application for **Intelligent Fire Management System,** where it gives continuous temperature reading and if the temperature exceeds a certain threshold, it will alarm and start sprinkling water. It will store the temperature data in cloud for flexible access.
